Frontex official publications fall into four main categories: risk analysis, training, operations and research, each marked with a distinct graphic identifier. Risk analysis publications bear a triangular symbol formed by an arrow drawing a triangle, with a dot at the centre. Metaphorically, the arrow represents the cyclical nature of risk analysis processes and its orientation towards an appropriate operational response. The triangle is a symbol of ideal proportions and knowledge, reflecting the pursuit of factual exactness, truth and exhaustive analysis. The dot at the centre represents the intelligence factor and the focal point where information from diverse sources converges to be processed, systematised and shared as analytical products. Thus, Frontex risk analysis is meant to be at the centre and to form a reliable basis for its operational activities.

Introduction

In January 2016, three new countries joined the Eastern Borders Risk Analysis Network (EB-RAN) operating under the EU-funded Eastern Partnership Integrated Border Management Capacity Building Project: Armenia, Azerbaijan and Georgia. Upon this extension, the network has been renamed as the Eastern Partnership Risk Analysis Network (EaP-RAN).

Concept

The Eastern Partnership Risk Analysis Network (EaP-RAN) performs monthly exchanges of statistical data and information on the most recent irregular migration trends. This information is compiled at the level of the Frontex Risk Analysis Unit (RAU) and analysed in cooperation with the regional partners on a quarterly and annual basis. The annual reports offer a more in-depth analysis of the occurring developments and phenomena which impact the regional and common borders while the quarterly reports are meant to provide regular updates and identify emerging trends in order to maintain situational awareness. Both types of reports

are aimed at offering support for strategic and operational decision making.

Methodology

The Eastern Partnership Quarterly statistical overview is focused on quarterly developments for the seven key indicators of irregular migration: (1) detections of illegal border-crossing between BCPs; (2) detections of illegal border-crossing at BCPs; (3) refusals of entry; (4) detections of illegal stay; (5) asylum applications; (6) detections of facilitators; and (7) detections of fraudulent documents.¹

The backbone of this overview are monthly statistics provided within the framework of the EaP-RAN (Armenia², Azerbaijan, Be-

larus, Georgia, Moldova and Ukraine) and reference period statistics from common border sections of the neighbouring EU Member States and Schengen Associated Countries (Norway, Finland, Estonia, Latvia, Lithuania, Poland, Slovakia, Hungary and Romania). The data are processed, checked for errors and merged into an Excel database for further analysis.

Structure

The general situational overview is broken down by main areas of work of border-control authorities and police activities related to irregular migration.

-
- 1 Please note that the analysis of this indicator is now limited to EaP countries only given that EU Member States have transitioned to the European Union Document-Fraud (EDF) reporting scheme.
 - 2 Statistical data provided from Armenia are not consistent with the definitions and format of the EaP-RAN and so could not be taken into account in the current report.

I. SITUATIONAL OVERVIEW

Figure 1. **Geographical scope of the Eastern Partnership Risk Analysis Network**

Note on definitions: 'common borders' refers both to borders between EU Member States and Belarus, Moldova and Ukraine (covered by both sides) and borders of EU Member States/Schengen Associated Countries with the Russian Federation (covered only by the EU/Schengen Associated Country side of the border)

Border surveillance

Illegal border-crossing

In the first quarter of 2017, 660 persons were detected for illegal border-crossing between border crossing points (BCPs) by the Eastern Partnership Risk Analysis Network (EaP-RAN)³ member countries. Ukraine reported the highest number of detections (54% of the total), followed by Belarus and Latvia.

Almost 68% of detections involved regional nationals (citizens of EaP-RAN and Commonwealth of Independent States coun-

tries), in majority Ukrainians, Moldovans and Russians. The vast majority of the reported cases (77%) was linked either to smuggling or to other reasons not related to migration.

Non-regional migrants constituted over 32% of detected cases, mostly involving Vietnamese, Turks, Bangladeshis and Indians. Irregular migration was the main reason for crossing the border illegally.

At the common borders, detections of illegal border-crossing between BCPs (re-

ported by both sides) decreased by 46% compared with the fourth quarter of 2016 and by 32% in relation to the same quarter of 2016.

At the Eastern Partnership (EaP) and external borders⁴, 311 cases of illegal border-crossing were detected. More than 70% of detections were made at the Ukrainian borders. The majority of detections involved regional nationals, namely Ukrainians, Moldovans and Russians. Non-regional migrants from a variety of countries were reported in low numbers.

³ Data from Armenia not available.

⁴ Data from Armenia not available.

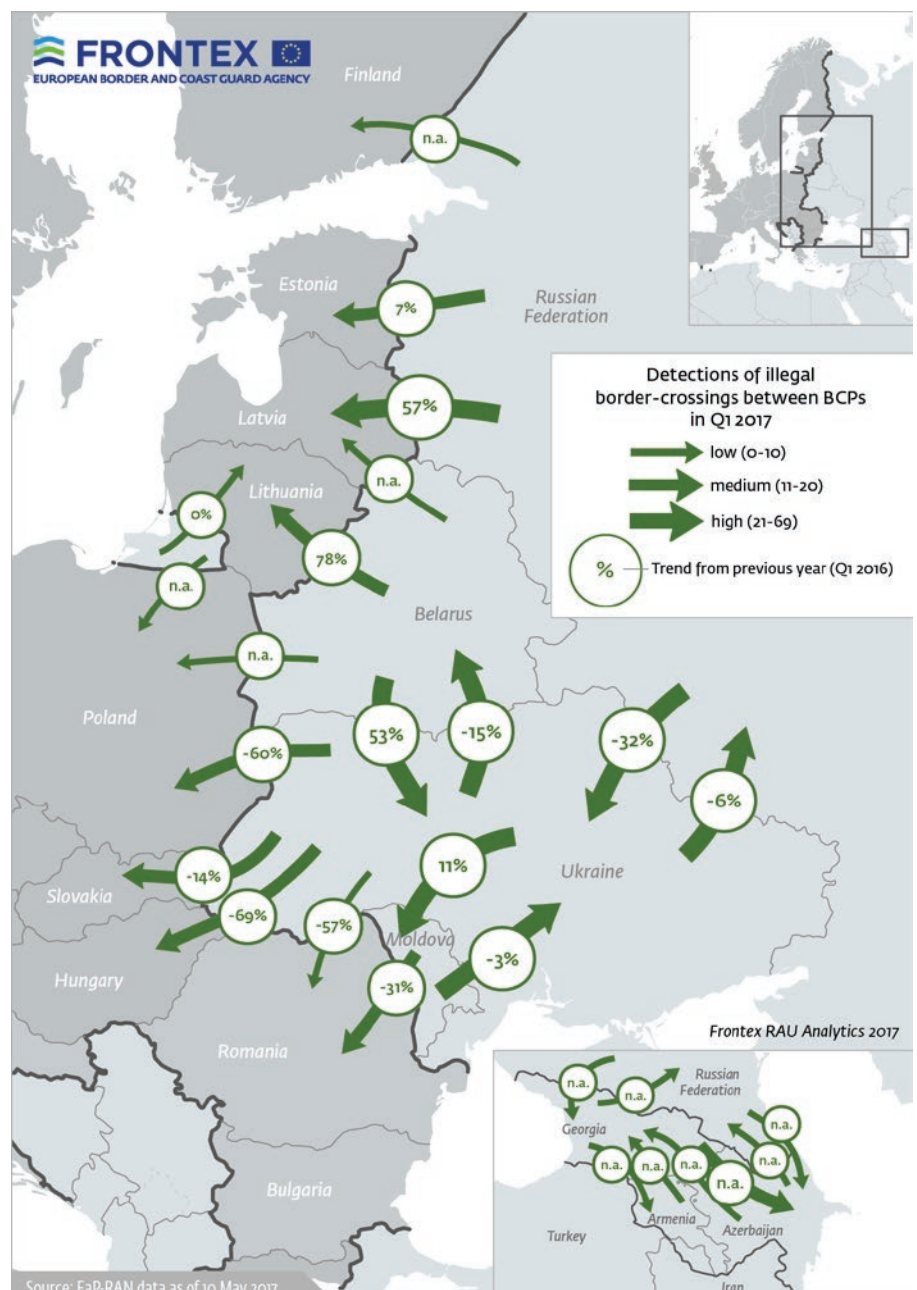

Facilitators

The number of detected facilitators at the common borders decreased by 83% in the first quarter of 2017 compared with the fourth quarter of 2016 and was 97% lower than in the same period of 2016.

As regards nationalities of facilitators detected on common borders, they were citizens of Belarus, Turkey, Georgia, Armenia and Tajikistan.

Figure 3. **Detections of illegal border-crossing between BCPs reported by EaP-RAN members at all borders show that the highest pressure in Q1 2017 was recorded at the Ukrainian-Moldovan border section with the majority of cases not related to migration**

Detections of illegal border-crossing between BCPs at all borders covered by the EaP-RAN in Q1 2017

Border checks

Clandestine entries

In the first quarter of 2017, there were three cases of clandestine entry attempts at the common border reported by Poland and were related to Russian and Ukrainian citizens.

Refusals of entry

There were 29 894 refusals of entry reported in the first quarter of 2017 within the EaP-RAN at the common, EaP and external regional borders.⁵ The vast majority of refusals (90%) was reported at the land borders.

At the common borders, refusals of entry issued by EU Member States and Schengen Associated Countries decreased by 27% in relation to Q4 2016 and increased by 23% in relation to the same period of 2016. The vast majority was reported by Poland (84%) with Ukrainian and Russian citizens representing the top-ranking nationalities.

EaP countries reported over 7 430 refusals issued at their external borders; 60% and 33% were issued at the land and air borders, respectively. The majority of refusals was issued by Belarus and Ukraine, followed by Georgia.

Document fraud

In the first quarter of this year, there was a 14% increase in detections of persons using fraudulent documents reported by the five EaP countries (Azerbaijan, Belarus, Georgia, Moldova and Ukraine) in relation to the fourth quarter of last year. Most detections were made by Azerbaijan, Ukraine and Georgia. Lower figures were observed by Georgia and Belarus.

Citizens of Nigeria, Ukraine, Tajikistan, Moldova and Uzbekistan were the top five among detected fraudulent document users.

The majority of commonly used fraudulent documents were passports (47%). Visas and stamps accounted for 26% and 18%, respectively.

⁵ Data from Armenia not available.

Situation in the Eastern Partnership region

Illegal stay in EaP-RAN countries

A decrease of 3.4% in detections of illegal stay was reported by Azerbaijan, Belarus, Georgia, Moldova and Ukraine in the first quarter of 2017. The top five detected nationalities included Russians, Ukrainians, Moldovans, Azerbaijanis and Geor-

gians. Citizens of the Russian Federation, Azerbaijan and Georgia were mostly detected by Ukraine, while Ukrainians were mostly detected by Belarusians. Moldovans, in turn, tended to be reported both by Ukraine and Belarus.

99% of detections of illegal stay were reported on exit with Ukraine as the top reporting country (65% of total detections). Ukrainian airports and Ukrainian land border sections were the most affected ones.

Explanatory note

Detections reported for Member States for indicators Illegal border-crossing between BCPs, Illegal border-crossing at BCPs, Refusals of entry and Document fraud are detections at the common land borders on entry only. For Facilitators, detections at the common land borders on entry and exit are included. For Illegal stay, detections at the common land borders on exit only are included. For Asylum, all applications (land, sea, air and inland) are included.

For EaP-RAN countries, all indicators – save for Refusals of entry – include detections (applications) on exit and entry at the land, sea and air borders.

Each section in the table (Border type, Place of detection and Top ten nationalities) refers to total detections reported by EaP-RAN countries and to land border detections reported by neighbouring Member States.
